

Our Decarbonisation Journey

Our Vision is to: contribute to the success of our customers with an uncompromising focus on people, safety and the environment.

	SCOPE 1	SCOPE 2	SCOPE 3	OUR SCOPE 1 & 2 EMISSIONS TARGET
CURRENT FOCUS	<ul style="list-style-type: none"> As part of the proposed expansion, install a new state-of-the-art incinerator to reduce emissions intensity by ~35 per cent. 	 <p>AGR has no Scope 2 emissions as it is a net electricity generator¹</p>	<ul style="list-style-type: none"> Identify, measure and monitor emissions across the supply chain Seek opportunities for lower emission inputs, such as low carbon ammonia and caustic soda 	
BY 2050	<ul style="list-style-type: none"> Carbon capture, utilisation and storage Offset residual emissions 		<ul style="list-style-type: none"> Adopt emerging decarbonisation technology, such as green ammonia 	

WE ARE COMMITTED TO:

Working with our stakeholders to accelerate action towards Net Zero across the value chains in which we operate.

Reviewing our decarbonisation journey annually and increasing our level of ambition as new technologies become commercially viable.

Embracing a phased transition, addressing quick wins first, while making meaningful progress on long-term solutions.

Proceeding with product volume growth only if it reduces the emissions intensity of that product over the investment horizon.

ENABLERS

Transparency	Increased disclosure of product emissions intensity
Partnerships	Working with suppliers, industry and researchers to deliver decarbonisation across our supply chain
Governance	Creation of a Climate Opportunities Project Management Office

¹ AGR is seeking to improve its heat recovery to enable more green electricity to be generated for others to use.
